-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Drawings*

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore:

**The first and second body portions must be shown or the feature canceled from claim 4; and**

**The slit must be shown or the feature canceled from claim 5.**

No new matter should be entered.

***Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application.*** Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. ***The objection to the drawings will not be held in abeyance.***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference signs mentioned in the description: 10 and 34. *Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application.* Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. ***The objection to the drawings will not be held in abeyance.***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character not mentioned in the description: 30. ***Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application.*** Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet"

or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. ***The objection to the drawings will not be held in abeyance.***

### ***Specification***

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

### ***Claim Objections***

Claim 3 is objected to as having a minor informality. **The claim dependency is not provided for claim 3. *Appropriate correction is required.*** It is assumed that claim 3 depends from claim 1.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Dalebout et al. (US 2002/0159253).

Dalebout discloses a device having a cylindrical handle [32] comprising a tubular body [10] configured to be gripped by the human hand, the body [10] includes inner surface [inside 36] and an open end [open end of 36], a light producing means [25] fitted

Art Unit: 2875

on the body, means for retaining a battery [batteries 40a, 40b fit inside the tube 36 when head module 12 is attached] and means [18a, 18b] for attaching the body to the cylindrical handle [32]. The light producing means can be directed at the ground [by rotating the module. A switch turns the light on and off by turning the head module [0028].

***Allowable Subject Matter***

Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Prior art fails to show or suggest a device having a cylindrical handle comprising a body configured to be gripped by the human hand, the body includes inner surface and an open end, a light producing means fitted on the body, means for retaining a battery and means for attaching the body to the cylindrical handle wherein the light producing means can be directed at the ground and wherein the body has a first portion and a second portion wherein the first and second body portions are assembled around the cylindrical handle.

Prior art fails to show or suggest a device having a cylindrical handle comprising a body configured to be gripped by the human hand, the body includes inner surface

Art Unit: 2875

and an open end, a light producing means fitted on the body, means for retaining a battery and means for attaching the body to the cylindrical handle wherein the light producing means can be directed at the ground and wherein the body is made of a semi-flexible material with a memory and the body is tubular with an elongated slit running the length of the tubular body forming surfaces that may be separated from each other to position the body around the handle.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note US patents to Collins, Santuccio, Yound, Hae et al. and Conkle.
